

Professional Profile Webinar Ideas

Title: Exchanging Credentials and Professional Data Using the Healthcare Professional Profile

Logistics:

- Free registration
- Limited space (50 people total, including wg members and staff)
- Teleconference
- Powerpoint for download
- If a member would like to led web conferencing capability, much appreciated.

Key points

- What is the professional profile, and how does it make credentialing faster and easier?
- How is it used
- Who should use it
- Who is using it
- How can I get started using it
- What if I have questions
- About MedBiquitous
- About working group

Outline

I. Introductions

II. What is the professional profile

- XML standard for profile data
- Scope
- Benefits
- **Interaction** - Ask for questions from the audience

III. How is it used

- **Interaction** - ask a few participants to share how they are thinking of using
- Data collection
- Data distribution
- Credentials verification
- Within other standards

IV. Who should use it

- Organizations with primary source equivalent data
- Organizations that collect credentials data
- Organizations that need to verify credentials data
- Developers that offer credentialing software and services

V. Who is using it

- American Board of Medical Specialties
- Medical certifying boards
- American Osteopathic Association
- Federation of State Medical Boards
- American Academy of Pediatrics
- HighWire Press
- CECity

VI. How can I get started using it

- Download the implementation toolkit
- Compare what's in the standard to the dataset you need to exchange (gap analysis)
- Map standard to your database and research import export options
- Restrict the standard further to meet your own needs (required data, restrictions on length or content)
- Send standard and requirements to data partners
- Or just obtain a tool that supports the standard
- **Interaction** - ask for questions, lessons learned from implementers

VII. What if I have questions

- Implementation forums
- Working group feedback

VIII. About MedBiquitous

- Started by Johns Hopkins Medicine and professional medical societies
- ANSI-accredited standards developer

IX. About working group

- Chair - Mike Zarki
- Working group members

X. Open discussion
