Meeting action items

- Call Player - "Execution Model"
- eViP will stop @ level 3 conformance
- Creation of up to date list of available players
 - put on wiki - closed to working group members
- List of people (implementers/Medbiq) to call into eViP weekly Tech calls
- Minimum list of supported XHTML elements is as follows: [List of supported XHTML elements](#)
- Triggering need to be simplified.
 - E-mail proposals to simplify, and have a call specifically to square away triggering.

Discussion

- Triggering
 - Comment that for import/export use case, systems must be able to tell the difference between case data and data that is meant to be returned only if has been triggered.
