Hybrid/blended simulation group discussion

March 3, 2017

David, Luke, Deb, Rosalyn, Valerie

1. There may be a simulation profile. I've asked ADL about that but heard no response. I pinged Jason again today.
2. We noted the need to track key steps occurring in different parts of the activity/systems (manikin, preceptor application, facilitator). Key steps may be related to:
 - a. Communication
 - b. Body movement
 - c. Eye movement
 - d. Empathy/soft skills (objective representations of... maybe these can be captured as forms of previous items?)
3. David created the following in [google docs](#)
