

Specifications and Schemas

This page provides links to the current specifications and schemas for the working group.

The most up-to-date schemas are available from the [MedBiquitous XML Repository](#).

There's also

- [Changes: Version 0.48 to 0.55](#)
- [API proposal](#)
- [Attribute spreadsheet](#)
- [Poll results](#)
- [QTI Sample](#)
- [Counters on Links](#)
- [Rational template for Software Requirements Specification](#).
- [LSAL simple sequencing work](#).
- A set of UML class diagrams by Jeroen Donkers is available in this [pdf file](#)pdf file (3rd version). They summarize the VPD, DAM, and AM schemas and their relations.
- [Triggering revisited](#)

Flow diagrams outlining player functionality as well as VP screen shots together with corresponding XML code are available in the [Slides and Presentation section](#).

[Version 2.0 changes can be found here](#).
