

Performance Framework - Home

Welcome

The mission of the MedBiquitous Performance Framework Working Group is to develop XML standards and accompanying guidelines that allow one to represent expected levels of performance related to a competency in a standard format. Performance frameworks can then be referenced from other data to make learner performance data portable and easily understood across a learner's career.

If you have questions about the MedBiquitous Performance Framework Standard, please email medbiq@aamc.org.

Note: If you are looking for information on the MedBiquitous Competency Framework or Object Standard, please [visit this space instead](#).
