Educational Achievement - Home

Welcome

The mission of the MedBiquitous Educational Achievement Working Group is to develop an XML standard and accompanying guidelines to support a consistent format and structure for data concerning learners' educational achievement. Educational achievement allows systems to document learner competency and makes that data portable. This data is helpful to those considering the learner at transition points on the continuum. In addition, such information would be helpful to learners reviewing their professional development.

If you have questions about the MedBiquitous Educational Achievement Standard, please email medbiq @aamc.org.
